Café en Seine Dublin, Ireland

*Expand and create new spaces for your customers
increasing your business profitability.*

Café en Seine is one of the most emblematic and impressive places in the Irish city of Dublin.

An icon that opened its doors in 1993 and quickly became a favourite destination for locals and visitors to the city.

Nowadays, its legacy continues in a beautiful space that features several gastronomic experiences.

An authentic complex located in the heart of the city where you can enjoy a wide range of bars, spaces for private events and the stunning Parisian-style indoor 'Street garden'.

'We've been promised some sunshine and blue skies this weekend and well into next week. Needless to say we'll be opening the roof the second the temperatures rise.'- Café en Seine.

Large outdoor terrace of 200 m²
enclosed with a motorised
retractable roof.

Increase the number of tables **throughout
the year**, regulating the opening and air
circulation as needed.

Create beautifully designed spaces
and **enhance
customers' experience.**

The Sinclair Hotel Fort Worth, United States

Combine classy contemporary styles with exceptional performance to create unique, natural light-filled spaces.

Terrace with views

On the 17th floor of the building, an incredible terrace with a Cocktail Bar was designed for hotel guests and private events.

Custom design

Bi-fold doors equipped with Thermal Break are installed together with the retractable roof so that this fabulous outdoor area can be used at any time of the year.

The building's height and the climatic conditions made it necessary to pay special attention to technical demands such as the systems' wind load.

- 1** In **1930**, the now historic Sinclair Building was inaugurated to house booming oil companies.
- 2** The building design seeks to give the '**impression of extreme verticality**' and stands out for its Mesoamerican architectural motifs.
- 3** In **2013**, started the hotel renovation to create a new premium space that seeks to offer customers an exclusive experience.
- 4** In **2019**, The Sinclair hotel opened its doors and the rooftop space for events became one of its flagships.

Meraki Riyadh, Saudi Arabia

*Designs tailored to the needs of your business.
We study each case and offer an optimal solution.*

The Waney family opened the first Meraki restaurant in the heart of London.

A Greek-style space to enjoy the best Mediterranean ingredients and experience the warmth and generosity that characterises Greek hospitality.

After its great success in the UK, **Meraki opened a second restaurant in Riyadh**. Comfort and luxury merge in this place to offer customers a unique experience.

'When the dust settles and the sun rises, Meraki's terrace welcomes you.' - Meraki.

The retractable roof is combined with bi-fold doors to create a **versatile space full of natural light**.

Custom polygonal design to match the **curved design** of the restaurant facade.

Systems equipped with TB and high-performance glass **to ensure optimum insulation** for Riyadh.

BBK Kuna Bilbao, Spain

*A great entry of natural light with minimalist design to create
unique spaces in iconic buildings.*

Sustainability management

One of the main objectives of the BBK Kuna building design was to turn it into a **sustainable and efficient space**.

Amazing flood of natural light

A luminous central space for celebrations and events was created on the top floor. The aim was to achieve **emotional well-being and a large natural light opening**.

1 In **1916**, Ricardo Bastida built Casa Cuna in the heart of Bilbao La Vieja.

2 In **1930**, the Sala Cuna de San Antonio nursery school was founded, becoming a regional landmark.

3 In **2018**, the BBK foundation's proposal for the use of the building was submitted.

4 **BBK Kuna was inaugurated in 2021**, a space for social innovation comprising various agents linked to Sustainable Development Goals (SDGs)

Other systems Vertical enclosures

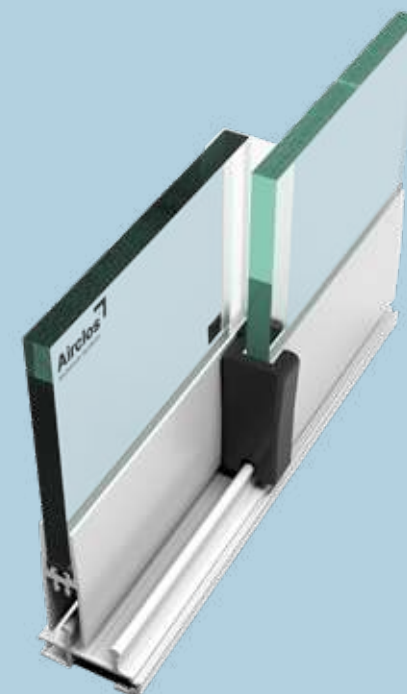

Complement your retractable roof and create stunning spaces that adapt to your business' needs at all times.

Bi-fold doors. We would like to highlight our high-insulation TB series (U_w values from $1.54 \text{ W/m}^2\text{K}$), as well as our minimalist and oversized series in which glass takes the leading role.

Vertical sliding panels. System consisting of large glass panels (up to $4 \times 4 \text{ m}$) that slide vertically. Its dimensions make it possible to achieve great panoramic views without losing insulation and tightness.

Sliding glass walls. Glazing systems without vertical profiles that help to protect rooms and terraces fully respecting the views and without altering at all the architectural style of the building's facade.
